

ABSTRACT OF THE DISCLOSURE

A luggage rack for a motorcycle having a shape conforming to the existing backrest on a sissy bar. The luggage rack is mounted to the existing mounting plate at brackets which may be selectively adjusted to provide the desired friction fit. The rack can be pivoted between an upright, stored position and a horizontal use position. In the stored position a stop associated with the brackets engage a portion of the rack to maintain it in a horizontal position. In one embodiment, a magnet on the rack exerts a force to retain the rack in an upright position against the sissy bar.
